

Freedom Pedestrian Push Button

Overview

The Freedom is a no touch – no contact pedestrian detector. Calls are activated when the pedestrian places their hand in close proximity to the surface of the push button. Easy for children, senior citizens, and pedestrians with disabilities to activate with a mere slide of the hand. The Freedom is configurable as a momentary or latching device. ADA and MUTCD compliant.

Latch Mode Configurations

The Freedom can be configured with momentary or latching LED. In the latching mode the pilot light is lit when the call is placed and remains on until the walk display is energized. All pushbuttons on the phase are synchronized. For operation in Latching Mode the 4 EVR requires an ENIM or PCIB.

Enlightened Interface Module (ENIM)

The ENIM mounts in the control cabinet. Field connections from the PPB interface with the load switches and field terminals at the interface module. One ENIM manages up to four phases and 16 push buttons.

Push Button Isolator Card (PBIC)

The PBIC fits in to a 170 card file and fills two card slots replacing the existing isolator cards in the rack. One card manages up to four phases and 16 Push Buttons

FEATURES

- Capacitive Switch
- No Touch
- Cannot be stuck in Constant Call
- Virtually Vandal Proof
- LED and Audible Tones
- ADA and MUTCD Compliant

 Made in the USA

PBIC

Feedback	
Visual	LED Super bright Red
Audible	Dee 2300 kHz – Dah 2000 kHz
Latching Mode	LED with ENIM/PBIC
Tactile	Optional Tactile Arrow

Electrical Specifications	
Operating Voltage	TS1 & TS2 (12 – 24 V AC/DC)
Line Voltage	30 V DC - 25 AC (rms)
Switch Current Max	200mA
On Resistance	<20 ohms
Operating Mode	NO
Closure Dwell	150ms
Switch	Self-Capacitance

Enlightened Interface Module

Operating Data	
Operating Force	< 1 lbft
Operating Temperature	-40C to 125C
Operating Life	∞
IP Rating	68

Materials	
Bezel	Al
Actuator	SS
Hardware	SS
Finish	Powder Coat

ABOUT

Campbell Company is one of the leading American manufacturers of pedestrian signal safety products, accessible pedestrian signals (APS) pedestrian push buttons, signs, and hardware.
